# Water Testing Program By Water Pro Inc.

People expect more from their water now than ever before. At Water Pro Inc we understand that need... and have arrived at a solution for those people who are health conscious and want to know what they are putting into their bodies. This service is a must for those who have had a new well dug and want to ensure the safety of their water, or those who have invested in a water treatment system and want to check its efficiency.. To meet the increased expectations, we first have to identify what is in the water. For this reason and many more, everyone needs a lab that they can depend on for reliable test data.

After much discussion, debate and preparation, we are proud to present to you a user-friendly testing package to fit your needs. Whether it is an encounter with unique water, or to confirm your field test data, this testing package is designed with you in mind.

Water Pro Inc. is a independently owned and operated company in the Gloucester Virginia area with more than 75+ years of combined water experience. Trust the Pros at Water Pro for your water testing, water treatment and well drilling needs.

Water Pro Inc also has the ability to come to you and draw samples, eliminating any sampling mistakes. These services are available in Virginia, Maryland and North Carolina. Call for quotes.

## How to Get Started

Simply call Water Pro Inc. at **804-693-7294** to order your sample kits. You will be billed a one time fee of \$ 105 for each kit when you order them, not when you send in the sample. Each kit will contain a lab slip to fill out, a bottle to collect your water sample, and a shipping container to ship the sample back to Clean Water Testing. Normal UPS pick-up and shipping is all that is needed. No special turnaround required.

## Important Notes

- This testing package is only available with the use of our pre-paid kits. This package is only offered to you through Water Pro Inc. Lab results are intended for informational purposes. If additional testing is desired, please contact Water Pro Inc. for pricing.
- E-mailed or faxed results in as soon as 5-7 business days.

Your Cost  
**\$ 105**
